## Relevant Work Experience

### Website, Inc.

SYSTEM ADMINISTRATOR

- Managed Linux server environments and other technologies for over 100 clients
- Assisted in the migration of customer data to new server and updating their services improving scalability, security, and efficiency
- Assessed customer's MySQL database issues remotely

Houston, Texas

May 2020 - Current

## Technical Experience

### Cyber Warfare

SAM HOUSTON STATE UNIVERSITY

- Constructed a secure, fully-functional virtual network using CentOS and Windows Server 2016 systems
- Successfully penetrated opponent's network through the use of social engineering, scanning, enumeration, and exploitdb

Class Project

January 2020 - May 2020

### Zoom Project

SAM HOUSTON STATE UNIVERSITY

- Identified vulnerabilities within the Zoom Video Conferencing application through extensive research
- Captured user credentials via packet poisoning and filtering; cracked with hashcat
- Successfully discovered the cause of the vulnerability, then provided possible remediation

Research Project

January 2020 - May 2020

### Collegiate Cyber Defense Competition

SAM HOUSTON STATE UNIVERSITY

- Participated with a team, in life-like scenarios, where we worked together to protect and defend our network against active attacks from professional penetration testers, forcing us to communicate and work together to utilize the strengths of each individual
- Identified potential threats, acknowledged abnormal behaviors, and dispersed important communication throughout the team in order to mediate and prevent threats to the other machines

Linux Specialist

January 2020 - May 2020
